

I See The Moon and
The moon Sees Me!

our class Moon Log

Dear Parent(s),

I am so happy to tell you about our exciting class project! we are learning to observe and record changes in the appearance of different objects. we will be observing the moon over the course of a month and recording it's appearance in the nighttime sky so that we can see it's complete cycle.

Your child has been chosen to be the official class "Moon watcher" for the night. Please take your child outside when night falls and search for the moon. How does it look? Your child may use the chalk or white crayons contained inside the Moon Bag to record your observations in our Moon Log. The moon should be drawn on the next available piece of black paper labeled with today's date. If your child chooses to use chalk to draw the moon, please use the hairspray contained in the bag to "seal" the illustration.

Please be sure to send the Moon Bag back to school with your child in the morning so that it can be sent home tomorrow afternoon with the next "Moon watcher". we will each take turns observing the moon and recording our observations to share with the class. Please be sure to return all materials to the Moon Bag and complete & sign the enclosed Moon Bag checklist.

I appreciate your support and look forward to embarking on this exciting "journey to space" with you! Thank you!
